TIMELINE FLAWS AND INCONSISTENCIES

- **Conflicting dates for nursing education:**
University start claimed in 2019 (age 39), yet describes training collapse on a cancer ward in 2012.
- **Simultaneous full-time roles across sectors:**
Claims 12 years in education starting ~2012, 25+ years in profit protection starting ~1997, and 20+ years in retail starting ~2000, all without interruption.
- **Health claims vs. activity level:**
Describes being in palliative care and severely ill as of 2022 while operating a business, running logistics, attending markets, and supervising volunteers.
- **Vague and unverifiable qualifications:**
No awarding bodies, registration numbers, or public records cited to support any education or clinical certification.
- **Unlikely clinical training scenarios:**
One-week prison placement (Cardiff men's prison) cited as nursing education. No NHS-backed structure confirms such format.
